BCL INFORMATION SHEET

Steve Baxter, P.Eng., RF

With over 32 years of field and account engineering and risk management experience, Steve Baxter has spent the last 18 years as an independent consultant after incorporating BCL in October 1999. BCL has provided loss control engineering and risk management services to the insurance industry, engineering consulting companies and private industry.

This consulting business was established to do contract engineering and risk management. The business focus is on account engineering/risk management type work and/or field servicing with focus on large industrial, commercial and institutional risks. In addition to property risk servicing, field evaluation work can be completed on other lines such as B&M, inland marine, liability (premises, products and environmental) as well as fleet. Formal plan reviews for new construction, sprinkler and alarm system design can be completed. New construction project co-ordination and special risk assessment work can be completed and tailored to the customer needs. Business Interruption evaluations can be completed as well as cyber risk assessments. Enterprise Risk Management consultation is also available.

Past work experience (prior to 1999) includes over 10 years of service with Kemper Insurance holding various positions of increased responsibility, most recently Account Executive – HPR Specialist. Work experience prior to Kemper, includes over 3 years with Factory Mutual Engineering as a property loss control consultant.

Extensive property experience attained in pulp and paper, steel (integrated mills, mini-mills and finishing mills), chemical and petrochemical plants, tire and rubber manufacturing, food processing, plastics manufacturing, mining and mineral processing (including underground), woodworking, warehousing and hospitals. Also, considerable experience over the years with breweries, distilleries, auto assembly plants, pharmaceutical manufacturing, high-rise buildings and most heavy industries. Previous property account engineering work involved international locations throughout the world.

Formal property loss control training was completed with Factory Mutual and additional training with Kemper for B&M, CGL (premises and products), environmental liability, fleet and inland marine lines with extensive work experience over the past 20 years on all these lines.

Other educational and professional achievements and memberships include:

- B.A.Sc. degree from the University of Toronto (Mechanical Engineer)
- Licensed professional engineer (P.Eng.) in Ontario
- RIMS Fellow (RF) designation (previously called FRM)
- Executive Member of the Southern Ontario Chapter of the Society of Fire Protection Engineers (SFPE) from 1999 to 2008
- Southern Ontario Chapter President of SFPE from 2004 to 2006
- "Professional Member" of SFPE International
- "Associate Member" of RIMS and Ontario RIMS chapter member
- Member of the Canadian Fire Safety Association
- Member of the Canadian Fire Alarm Association

International field inspection capabilities are available. BCL holds Commercial GL and Professional Liability (E&O) policies with worldwide coverage. A valid passport and worldwide medical coverage makes rush work anywhere in the world possible.
